Atelier Boonen - De Raat Lloyd Basic

Additional information

brand: De Raat Safes

De Raat Lloyd Basic – Archive cabinet for documents and files

The De Raat Lloyd Basic is a steel archive cabinet for keeping documents, binders and files organised and under lock. It offers basic protection against fire and burglary, but it is not certified: the cabinet has not been tested to a European fire or burglary standard.

The insulation meets DIN 4102. This standard classifies the insulation material; it is not a fire test of the cabinet itself. If you want to store paper or data with tested fire protection, choose one of our fire-resistant cabinets.

The Lloyd Basic comes in four models, from 254 to 817 litres. The Lloyd Basic 900 is 1200 mm high; the 901, 902 and 903 are 1950 mm high and 670, 950 or 1200 mm wide. All models have a single door and an internal depth of 400 mm, suitable for binders. The shelves are height-adjustable: two in the Lloyd Basic 900, four in the taller models. Extra shelves are available.

As standard, the cabinet is fitted with a double-bit key lock, supplied with two keys. A mechanical or electronic code lock is available on request. The cabinet is prepared for floor anchoring. The stated external depth excludes the 60 mm fittings. Colour: light grey RAL 7035.

Looking for an archive cabinet tested against both fire and burglary? See the De Raat DRS Combi-Paper: 30 minutes of fire protection for paper (EN 15659, LFS 30P) and burglary resistance S1 or S2 (EN 14450).

See also our other security cabinets or read how to approach buying a safe in Belgium, with delivery and installation by our own team.
