Atelier Boonen - De Raat Terra floor safe

Additional information

brand: De Raat Safes

De Raat Terra – Floor safe for concrete, with round or square opening

The De Raat Terra is a heavy-duty steel floor safe that is built into a concrete floor. Once set in concrete, only the lid remains visible. The Terra is not certified to a European burglary standard. If you are looking for a certified floor safe, see the ATB BT floor safe (EN 1143-1 grade 1).

The Terra comes in two sizes: the Terra 1 with 11 litres of internal space (internal dimensions 229 × 215 × 215 mm) and the Terra 2 with 25 litres (305 × 290 × 290 mm). Each size has a round opening of Ø 156 mm or a square opening of 200 × 200 mm.

As standard, the Terra is fitted with a double-bit key lock, supplied with two keys (version K). Each version is also available with an electronic code lock (version E). We advise against it: a floor safe often comes into contact with water or moisture, which can damage an electronic lock.

See also our other built-in safes or read how to approach buying a safe in Belgium, with delivery and installation by our own team.

- Not certified against burglary or fire
- Floor safe for installation in concrete
- Round opening Ø 156 mm or square opening 200 × 200 mm
- Version K: double-bit key lock, 2 keys
- Version E: electronic code lock (not recommended due to water and moisture)

- Terra 1: 11 litres, Terra 2: 25 litres
- Colour: RAL 6018 yellow green
