Atelier Boonen - Filex S2-30P

Additional information

brand: ATB Safes

Filex S2-30P – burglary resistant to EN 14450 S2 and fire resistant for 30 minutes for paper

The Filex S2-30P is a compact safe with dual certification by ECB·S: burglary resistant according to the European standard EN 14450, Security level S2 (certificate 1012/SC26-02), and fire resistant for 30 minutes for paper according to EN 15659 – LFS 30P (certificate 1012/LFS26-01). This fire class protects paper documents; digital media such as USB sticks and hard drives have their own data classes.

The door locks on three sides and opens to 180°, giving full access to the interior. The shelves are height-adjustable; their number depends on the size, from none in the smallest model to two in the largest models. The safe fittings protrude 35 mm beyond the stated external depth.

Each size is available with a double-bit key lock or with an electronic code lock, both to EN 1300. The electronic lock uses a six-digit code, with a master code and a user code. After four wrong codes, the keypad is blocked for five minutes. The lock is powered by a 9V battery in a compartment on the underside of the lock.

The Filex S2-30P is available in five sizes, from 10 to 95 litres of internal volume. Each safe has two anchoring holes in the base and the anchoring material is included. Without anchoring, the certified resistance class is not guaranteed. Looking for the same classes with four-sided locking? See the Salvus Palermo.
